Please add the following new Abstract of the Disclosure as a separate page after the claims:

ABSTRACT OF THE DISCLOSURE

An antenna device for a portable radiocommunications apparatus, a so-called cell or mobile telephone, has a carrier produced from electrically insulating and non-magnetic material. The carrier is fixable on a circuit card in the mobile telephone and supports a radiator. The radiator has a contactor device for contact with a corresponding contactor device on the circuit card. The carrier has an accommodation space in which an anchorage portion on the circuit card is insertible and fixable. The radiator is disposed on the distal end of the carrier seen from the circuit card.
